Subject: RFP#: 16-244_Engineering Design and Construction Inspection Services for an African Penguin and Flamingo Exhibit at the Turtle Back Zoo

Good Morning, Lenord

I am writing in reference to RFP#: 16-244_Engineering Design and Construction Inspection Services for an African Penguin and Flamingo Exhibit at the Turtle Back Zoo.

I need some additional information to efficiently complete the RFP for the Overall Site Plan of Turtle Back Zoo.

The information needed is as follows:

1. A site plan of existing utility (electrical, gas, water, fire, phone, cable, fiber) that currently serve the Zoo and adjacent areas; *NOT Available*
2. A site plan of existing stormwater and sanitary sewer infrastructure that currently serve the Proposed Location of the Penguin and Flamingo Improvements shown on the site plan or portion thereof; *The selected Proposer has to prepare this*
3. A preliminary construction estimate prepared by Union County Public Works for the project, or any evidence of estimated costs prepared within the last five (5) years for the proposed projects; *NOT Available*
4. A list of any projects which have been completed adjacent to the proposed location, the construction plans for those projects, the respective Union County Project Manager, and contact for the respective projects; *This is an OIRA Request*
5. A contact at the Zoo where we may call to schedule a site visit; *Answer Already*
6. A lowering of the aggregate Professional Liability from \$3,000,000 to \$2,000,000 *NO*
7. Estimated/desired construction timeframe since this allows all consultants to estimate their inspection time based on the County's desired construction duration. *6 months*

I look forward to receiving your response.

Thanks In Advance for your assistance.

Best Regards,

Wanda Thompson, Administrator
